

EcoCare 250Y Odor Eliminator

EcoCare 250Y is blend of EcoCare 250 and Yucca extracts specifically formulated to reduce manure odors, ammonia, and sulfides. It improves liquefaction and pumping, as well as reducing solids buildup.

- Concentrated natural fermentation product
- Biodegrades odors - Not a perfume or masking agent
- Non-toxic, non-flammable, non-hazardous
- Environmentally-friendly

Odor Sources Applications:

REFUSE, RECYCLING & LANDFILLS

- Leachate ponds
- Fluent streams

COMPOSTING

- Liquid waste/washings- Fluent streams
- Rain & run-off collection ponds

INDUSTRIAL PLANTS

- Liquid waste streams
- Holding tanks
- Lagoons

AGRIBUSINESS

- Channel wash/waste collection
- Fluent stream
- Lagoons/pits
- Animal bedding

Instructions:

Dilute 1:20,000 – 1:100,000 depending on odor type and intensity.

Tanks/Lagoons/Leachate Ponds: Start by diluting 2 ounces of EcoCare 250Y into one gallon of water for every 1,000 gallons of liquid waste in lagoon/pond/tank. Distribute evenly over lagoon/pond/tank surface using water cannon or hydro seeder. Repeat and adjust dilutions as needed.

Fluent Streams: When using a proportioning or metering pump to inject EcoCare 250Y concentrate, begin at about 1 part concentrate to 25,000 parts of stream flow. Metering pump capacity may require pumping a pre-dilution. The fully diluted dosage of EcoCare 250Y concentrate into fluent stream should approach 1: 25,000. Adjust dilution as odor intensity requires.

Contents:

EcoCare 250Y contains natural protein enzymes and surfactants derived from cereal, vegetable extracts, carbohydrate ferment and Yucca extracts.

Handling:

Good handling practice and appropriate protection are always used when working with concentrated products. Stir contents before using.

Storage:

For maximum effectiveness and longevity store EcoCare 250Y below 125° F.
